Green Industry: Mobile Equipment & Inventory Tracking Technology

Walled Lake, MI (January 29, 2016) – [Invisi-tag](http://www.invisi-tag.com) is a Walled Lake, Michigan based technology firm that has changed the way landscape companies track their mobile equipment, tools and inventory assets. Invisi-Tag has created the perfect on-the-spot inventory system for the landscape industry. It allows for the user to always know if their truck/trailer has been loaded with the specific equipment that is needed—all from your mobile device! You can make sure that every single piece of equipment is accounted for before you leave, and that none of it is being left behind at a job site after you're done. This will increase your productivity, which in turn will increase your profits!

[Invisi-tag](http://www.invisi-tag.com) has developed a landscape industry specific asset tracking system and digital checklist technology. The process is simple, Tag all mobile equipment, tools and inventory... at the end of each work day before leaving the site, scan your trailer, storage container, truck etc. and receive an on the spot digital checklist of your equipment inventory...If something is missing your still onsite...NO lost time, NO Lost equipment and most importantly you have crew accountability, NO MORE EXCUSES.

Invisi-Tag User Testimonials

Landscaping
"Our Landscaping division Plans to tag everything."

Dave Rousselo
Lawn Service Manager
Troy Clogg

Landscaping
"I would certainly recommended it to other contractors."

Elizabeth Alexander
Operations Manager
